Interesting finds: July

Jorunna tormentosa
Velvet Dorid

Velvet Dorid egg cases

Tripterygion delaisia
Black faced blenny

Interesting finds: July

Aplysia punctata
Seahare

Pruvotfolia pselliotes

Protula tubularia
Red spotted horseshoe worm

Lissoclinum perforatum
Tunicate

Gongolaria baccata
Bush berry wrack

Sabellidae
Feather duster worm

Sphaeroma serratum
Isopod

Maeridae
Amphipod

Carnation coral

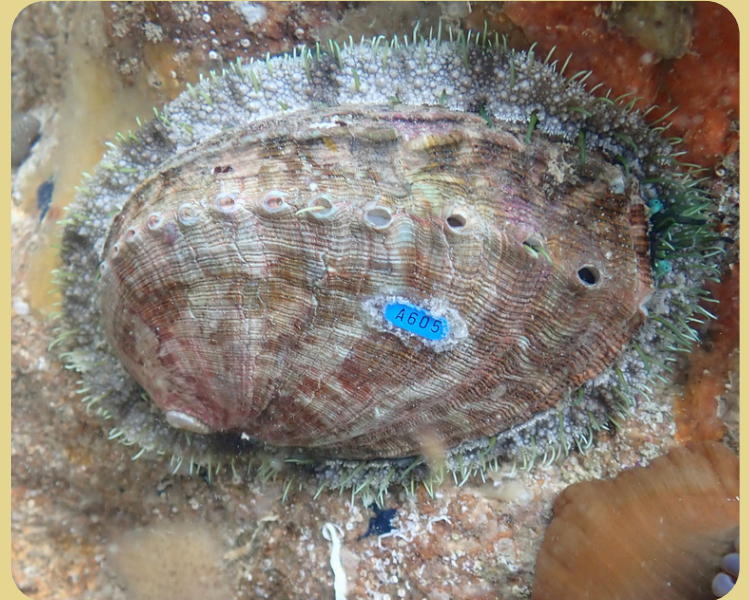

Elysia viridis
Sap-sucking sea slug

Acanthochitona sp
Bristly chiton

Favorinus branchialis
White Aeolis

Members are recording some of the previously tagged ormers. If you come across one please make a note of the date, location and tag number and let us know by emailing us at **MarineBiology@societe.je**

This will allow the section to add to data already collected and increase our knowledge about Ormers.

By collecting this data we will be able to monitor aspects such as growth and survival rates.
