

Jersey
Building
Preservation
Trust

We provide skills training for those involved in the historic built environment. Our day courses can be used to improve existing skills, or will start your journey to becoming accredited in building conservation.

You will have the opportunity to visit and learn about historic buildings in Jersey. At present these include 16 New Street, an 18th Century townhouse in St Helier (National Trust for Jersey) and La Ronde Porte, a 17th-19th Century farmstead in St Saviour (National Trust for Jersey). You will be taught by experts in their fields from both Jersey and the UK.

Courses are open to **everyone** -

- Construction and Building Trades
- Construction Professionals
- Related Professions
- Homeowners and anyone else who's interested. There is no requirement to be already involved in construction.
