# Crab survey – student project

Some of our members assisted JICAS student Nathan with his research project, this month. A crab survey was conducted at Portelet and Ouaisne. All results recorded using epicollect.

As well as the crabs recorded, we found a few other interesting species!

# Out and about and under the waves

One of our members decided to go jellyfish hunting at Bouley Bay and she didn't have to look for long. They are not everyone's favourite marine organism, but they are beautiful. Head to our facebook page (link below) to see the video.
